A robust *Live Online Credit Card Processor* designed especially for the unique needs of the growing company that has the need to process customers credit cards during the sale or after the shipping process. The C&A Online Credit Card Processor not only collects invoice, sales order and credit card information directly from SAGE BusinessWorks but it writes back the payment against the invoice (or open credits if using a sales order). This add-on tool is a must for all growing companies who process customer's credit cards at the time of or after the sale. If the need arises, the customers credit card information can be changed during the charge process. Designed to work with C&A e-Commerce Solutions, bar coded paperwork and **any merchant supplier**.

Advantages

- Is SAGE Payment Services ready.
- Initial purchase license allows installation on up to 3 workstations.
- Unlimited phone technical support & training.
- Archives all history information on each credit card sale in daily folders for quick access incase of questions.
- Conforms to new banking laws concerning credit card information.
- Normally takes only 7 to 10 seconds to processes the credit card on line.
- Can be used in a Multi-Company mode.
- Allows posting of credit card payment directly to the BusinessWorks invoice upon receipt of a valid credit card approval code.
- Saves valuable accounting staff time.
- Eliminates data input errors.
- Minimal setup and no added monthly and transaction charges above and beyond the processing bank fees.
- Works with barcode scanners for rapid invoice lookup.
- So simple to use, anyone can now process credit cards and post the payments to BusinessWorks all in one process.
- Will print and e-mail credit card receipts.
